

Cotton Production Report

Cotton Production Report — Sample edition

Global Cotton Production Trends — 2019–2024

Page: 1

Overview

World cotton production moved broadly sideways between 24 and 27 million tonnes over 2019–2024, with weather and area shifts driving year-to-year movements. Production recovered strongly in 2023/24 following drought-reduced harvests.

Production by marketing year

2019/20: 26.1 million tonnes
2020/21: 24.4 million tonnes
2021/22: 26.0 million tonnes
2022/23: 24.7 million tonnes
2023/24: 27.1 million tonnes
2024/25 (f): 26.3 million tonnes

Commentary on the historical trend

The overall trend over the 2019-2024 period was roughly flat, with a cyclical pattern driven by planted area responses to price signals and by monsoon and irrigation conditions in China, India, and the United States. Brazilian output rose steadily and reached a record share of global production by 2024.

Marketing year	World production (mn t)
2019/20	26.1
2020/21	24.4
2021/22	26.0
2022/23	24.7
2023/24	27.1
2024/25 (f)	26.3
